Rules-based signal computed from public sources and Crustdata's indexed data (including estimates). It is not financial advice and does not replace diligence, references or legal review. Private-company financial statements are not public; revenue figures are third-party estimates. Every figure carries its source; verified claims cite evidence IDs (E = source passage, G = Crustdata graph value) listed on the methodology page. Crustdata funding data is an indexed record (Crunchbase-derived), not an independent source.

How revenue is estimated

Interval-censored regression on 126 companies' Crustdata revenue bands, corrected by a leave-one-out bias factor from reported revenue, blended 50/50 with a revenue-per-employee benchmark for scaleups, then guardrails. Median error 14% on 6 companies with public revenue (all within 2×). Headcount 3,757 is inflated by namesake profiles, so per-employee figures are distorted; estimate is 1.8x the Crustdata band top.

10 Methodology

How every number and status in this report was produced.

Pipeline

1. Identity: the domain resolves to one Crustdata company ID (a tie abstains).
2. Sources: the funding announcement and coverage are fetched; text addressed to AI agents is data, ignored.
3. Claims C1, C2…: material Team & Financing statements quoted verbatim from those sources.
4. Graph: founders' roles and prior employers joined by employer ID; rounds matched to the indexed record.
5. Gate: code checks every amount, percentage, year and date against cited evidence; an entailment check confirms each sentence. Failures are withheld, never repaired.
6. Signals and scoring: indexed growth, market and founder data feed five pillars and fixed flag rules.

Scoring model

Pillar weights: Team 25% · Traction 30% · Market 15% · Financing 15% · Verification 15%

Weighted score 59/100 → rating **ACCUMULATE**; confidence medium. Suggested allocation = standard check × sizing ($100K × 50% = $50K).

This run: 0 documents, 0 evidence rows, 0 claims, 0 sentences emitted, 0 withheld, Crustdata credits 0 + signals 0.

Rules-based signal computed from public sources and Crustdata's indexed data (including estimates). It is not financial advice and does not replace diligence, references or legal review. Private-company financial statements are not public; revenue figures are third-party estimates.

Limitations

- Indexed total funding includes 2 secondary-market (tender) entries; primary-only sum shown separately.
- Funding figures are an indexed record (Crunchbase-derived), not independent confirmation.
- Index lists a stock ticker without an IPO date; treated as private (private: ticker RAMP in the index has no IPO date (treated as a namesake)).
- Revenue band and web traffic are third-party estimates, not reported figures.
- News kinds are a title-keyword heuristic; indexed news can include namesakes.
- 6 search result(s) whose last round was a grant, debt or crowdfunding were left out of the peer table (still in the funded count).
- Peers are companies tagged 'Credit Cards + Business Travel' (Crustdata taxonomy), founded 2017 or later; the category match is coarse and is not a verified competitor set.
- SEO competitor domains are raw keyword overlaps (often namesakes), not a verified competitor list.
- No data for field group: public_launches
- No data for field group: metadata
