Rules-based signal computed from public sources and Crustdata's indexed data (including estimates). It is not financial advice and does not replace diligence, references or legal review. Private-company financial statements are not public; revenue figures are third-party estimates. Every figure carries its source; verified claims cite evidence IDs (E = source passage, G = Crustdata graph value) listed on the methodology page. Crustdata funding data is an indexed record (Crunchbase-derived), not an independent source.

6 Team economics and revenue

What the team costs, how that compares locally, and what the company likely earns.

range $364.2K–$490.8K	estimate / headcount	≈ ₹7.4 lakh / yr	funding amount undisclosed

Average salary vs local benchmarks (₹ lakh / yr)

At about ₹7.4 lakh a year, the estimated average is 2.5× India's average salaried wage and in line with IT-services majors: competitive pay for an Indian startup, while keeping burn low. The company figure is a model estimate (benchmarks × role mix × job-switch premium), not reported pay.

How revenue is estimated

Interval-censored regression on 126 companies' Crustdata revenue bands, corrected by a leave-one-out bias factor from reported revenue, blended 50/50 with a revenue-per-employee benchmark for scaleups, then guardrails. Median error 14% on 6 companies with public revenue (all within 2×). Band is stale (listed 11-50, actual 7); early-stage: no reported-revenue correction; model and band only.

10 Methodology

How every number and status in this report was produced.

Pipeline

1. Identity: the domain resolves to one Crustdata company ID (a tie abstains).
2. Sources: the funding announcement and coverage are fetched; text addressed to AI agents is data, ignored.
3. Claims C1, C2…: material Team & Financing statements quoted verbatim from those sources.
4. Graph: founders' roles and prior employers joined by employer ID; rounds matched to the indexed record.
5. Gate: code checks every amount, percentage, year and date against cited evidence; an entailment check confirms each sentence. Failures are withheld, never repaired.
6. Signals and scoring: indexed growth, market and founder data feed five pillars and fixed flag rules.

Scoring model

Pillar weights: Team 25% · Traction 30% · Market 15% · Financing 15% · Verification 15%

Weighted score 64/100 → rating **ACCUMULATE**; confidence medium. Suggested allocation = standard check × sizing ($100K × 50% = $50K).

This run: 0 documents, 0 evidence rows, 0 claims, 0 sentences emitted, 0 withheld, Crustdata credits 0 + signals 0.

Rules-based signal computed from public sources and Crustdata's indexed data (including estimates). It is not financial advice and does not replace diligence, references or legal review. Private-company financial statements are not public; revenue figures are third-party estimates.

- No 'news' data indexed for this company.
- Web visitors YoY not computable (no non-zero month 12 months before the latest).
- Funding figures are an indexed record (Crunchbase-derived), not independent confirmation.
- Index lists a stock ticker without an IPO date; treated as private (private: ticker TERRASTACK in the index has no IPO date (treated as a namesake)).
- Revenue band and web traffic are third-party estimates, not reported figures.
